Objective

A position as solution designer in SQL Server, Data Warehousing or Networking where my skills and experience can continue to grow and I can bring value to an industry-leading company.

Experience

July 2003 – Present

Sunbelt Rentals, Inc
Charlotte, NC

SQL Server DBA / SQL Server Developer

Plans, coordinates and administers databases, including database definition, structure, documentation, requirements, operational guidelines, and protection. Ensures accuracy and completeness of data. Establishes and maintains security and integrity controls. Formulates and monitors policies, procedures and standards relating to database management. Administers physical servers. Identifies and resolves performance issues.

Projects of Interest

- Rewrote the commissions program to use a different ERP system as well as make the process more dynamic
- Built a system to keep an updated copy of our AS/400 based ERP system data in SQL for faster and consistent use by all applications completely in T-SQL
- Worked with a Data Warehousing company to design a Sales Management, Analysis, and Reporting system, including dashboards and Sales Performance Ranking in SQL 2005
- Developed a Rental Fleet Management and Replacement system that involves budgeting and capital purchasing requests and approvals
- Determined and implemented our SQL 2005 migration plan and hardware requirements including building two SQL 2005 clusters on a SAN
- Worked with an external vendor to implement Microsoft CRM Server and integrate it with our environment
- Developed reports and analysis using SQL Reporting Services and ProClarity
- Designed and implemented a new security model for our intranet, reporting, and analysis services that allows for centralized but flexible user to store mapping

September 1992 – July 2003

Jonathan Wentz Computer Consulting

Sole Proprietor

Started my own company while in the 6th grade. Services provided to customers include: installation of home and small business systems, consultations and analysis in support of making product (hardware and software) recommendations, web design and development, performing system upgrades, resolving computer problems, and one-on-one tutoring.

October 2000 – June 2003

NCSU Departments: Toxicology & Microbiology
Raleigh, NC

IT Administrator/Desktop Support

The only line of computer and technical support for both departments. Responsibilities included installation, upgrading, troubleshooting, web design including data-driven pages, and Windows 2000 Server, Exchange 2000, and SQL Server 2000 administration.

Education

August 1999 – May 2003

North Carolina State University
BS in Computer Science
